

PDF-4+/Web 2023

PDF-4+/Web 2023 is licensed for use on a PC that has the PDF-4+/Web hardware dongle attached. The software may be installed on any number of computers; however, the licensed software can only be operated on the computer with the dongle attached. For concurrent access to the PDF-4+/Web database, additional licensed dongles must be purchased. Each dongle must be registered to enable a connection to the ICDD database server.

The PDF-4+/Web 2023 database contains integrated data mining software and ICDD's search-indexing software, Sleve+ (sold separately). In order for Sleve+ to be activated, a license for Sleve+ must be purchased from ICDD or your vendor. **The full license period is for one year following the date of registration.**

OEM and Vendor Software

Please contact your software vendor to determine its compatibility with PDF-4+/Web 2023. Several OEM and vendor software packages support PDF-4+/Web 2023. In addition, some software vendors provide the ability to save their compiled index files to the dongle's 2GB of flash memory facilitating portability between computers.

Caution: A fee of \$500 USD will be charged to replace lost dongles. In order to receive a replacement dongle, you need to report the lost dongle's serial number to sales@icdd.com. ICDD will "turn-off" the lost dongle and ship a replacement dongle upon verification of your license.
